Program Overview

Electrolysis

This program teaches Electrolysis, Thermolysis, the Blend Electrolysis systems and other related subjects. Practice in probe insertion, sanitization and safety procedures plus the supporting theory will train students to remove hair as a profitable profession. Other subjects taught: Analysis, Consultations, Examinations, Exercises, Insertions, Probe Positioning, Problems, Procedures, Regrowth, Scheduling and Terminology. **This program consists of the courses, Electrolysis and must be taken with Fundamentals and the Electrolysis Clinic,** either as a specialty program for a diploma (graduation certificate) or used as an elective to the Hairdressing Program. Currently there is no licensure or exam available in the State of Pennsylvania for Electrolysis. However, if you wish to practice in a licensed beauty, skin or manicuring salon this program will have to be attached to a program leading to licensure in Pennsylvania. There are few physical demands on the electrologist. Some physical characteristics which may enhance working as a profitable professional are Flexible wrists, good eye sight, and a steady hand. A small percentage of electrologists have been prone to develop lower back strain and eye strain. **Graduation requires earning a minimum of 400 hours by satisfactory completion of the Electrolysis course and additional weeks spent in a Electrolysis Clinic and the Fundamentals of Non-Hair services courses.** Upon graduation each student receives a diploma (graduation certificate). This program prepares graduates for entry level employment as an Electrologist and other hair removal occupations.
